

SMART ASSESS JA

Smarter Assessments.
Better Learning.

Built for Manchester High School

Strategic presentation and hands-on session

Today: the strategy, then the experience

Part 1: The strategy

About 30 minutes

- The problem, and the scale of it
- Smart Assess, Smart Learning and Smart Play
- How it fits the roles in your school
- A pilot pathway we can shape together

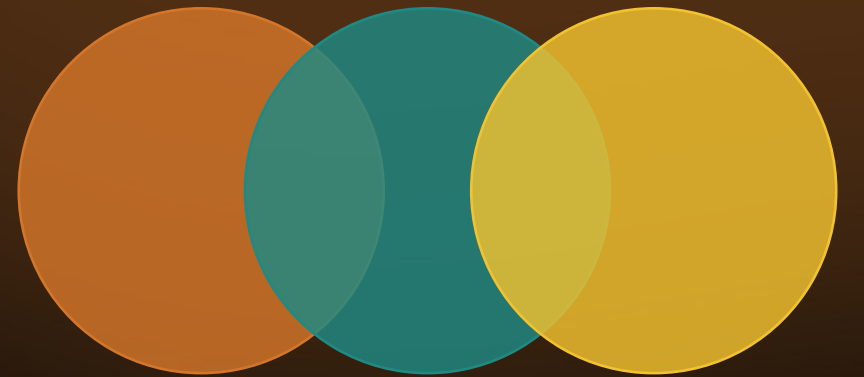

Part 2: Hands-on session

About 40 minutes

- Experience it as a teacher, a student and a leader
- Explore on your own for 10 minutes
- Tell us what works and what does not
- Decide together where it could start

By the end: a shared view of where Smart Assess Ja could start at Manchester High School.

Technology finally organized around how a school actually works.

That is the idea behind Smart Assess Ja.

Every term, learning travels onto paper, and back again

1

Teacher creates the exam

2

Exam is printed

3

Copies multiply

4

Students sit the exam

5

Papers are collected

6

Teacher marks

7

Grades are recorded

8

Results are analyzed

9

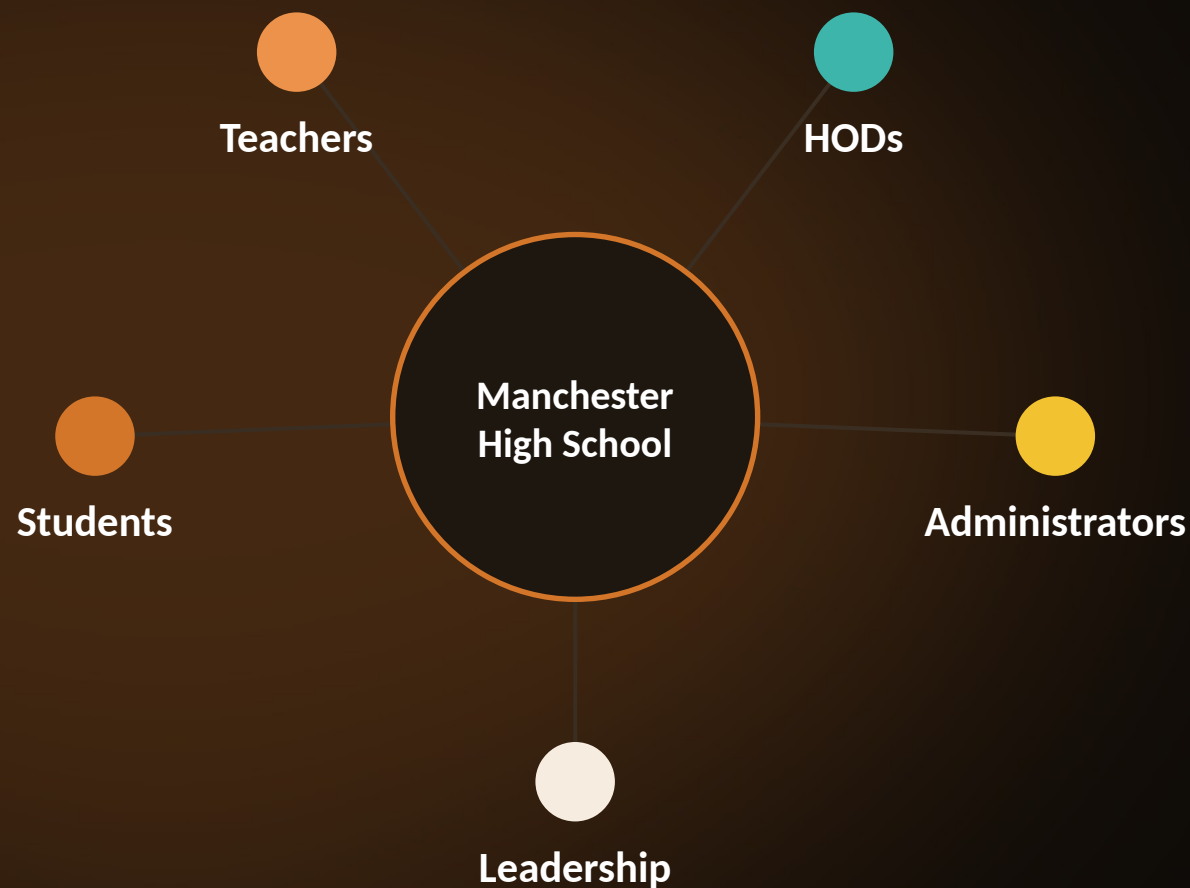

Who needs help?

Time. Cost. Paper. Administration. Fragmentation.

One school of about 1,800 students

≈ 1,800
students

Every test, lesson and class creates information. The question is whether teachers and leaders can see it.

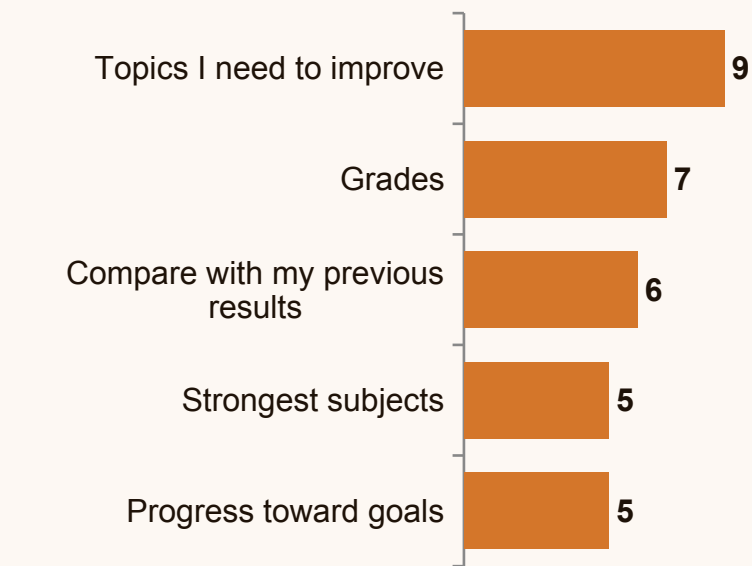

What 12 Manchester students told us

What would help you learn a difficult topic?

If a platform showed your progress, what would you want to see?

IN THEIR WORDS

"Interactive quiz competitions where you could compete with students islandwide."

"It should be offline as well as online."

"Better wifi access."

"Challenges between students online."

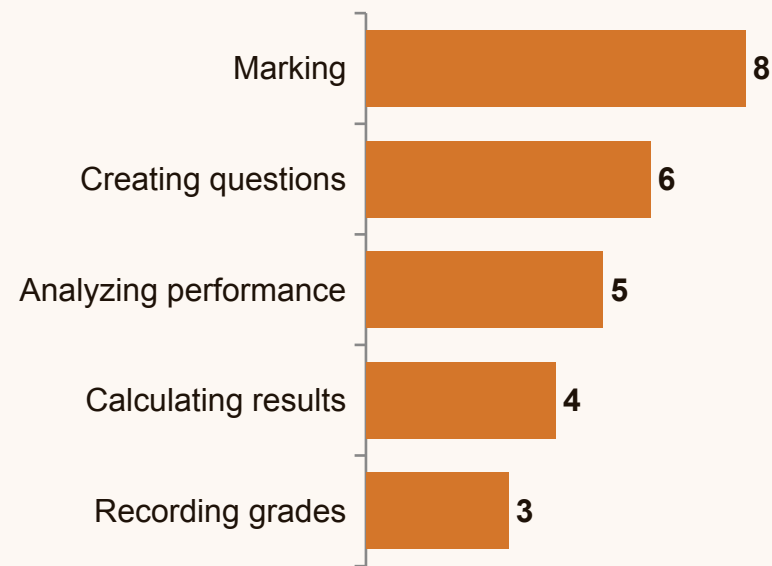

"AI tutor."

10 of 12 want help studying for exams. 7 of 12 chose flashcards for practice. Wifi and offline access came up in their own words.

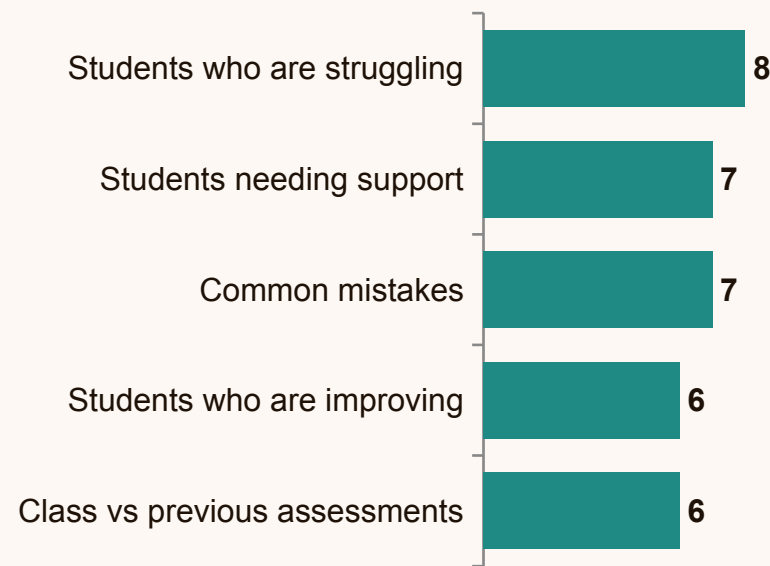

Manchester High School student survey. 12 students, who could tick as many answers as they liked. A small sample, so read it as a signal, not a verdict.

What 10 Manchester teachers told us

Which parts of assessment take the most time or effort?

What should a platform tell you about your students?

AND ALSO

9 of 10
want a platform to show what a student missed

9 of 10
want activities for different ability levels

8 of 10
want AI-assisted lesson planning

"A learning gap tracker that analyses assessment results, identifies areas where students need support and suggests suitable activities for reteaching and practice."

Manchester High School teacher survey. 10 teachers, who could tick as many answers as they liked. A small sample, so read it as a signal, not a verdict.

Three products. One ecosystem

SMART ASSESS

Measure learning.

Exams, tests and tasks, results, report cards and department insight.

Available now

SMART LEARNING

Deliver and recover learning.

Structured lessons, check-your-understanding, and a path back for students who miss class.

Switched on at Manchester

SMART PLAY

Engage and reinforce learning.

Practice that feels like play: Topic Mastery, Math Duels, live games and rewards.

Coming soon

Smart Assess: every assessment, one secure record

From a five-minute pop quiz to a formal end-of-year exam, built once and kept in one place.

Teachers stay in control of marking

Exams, tests and tasks

Pop quizzes through final exams

Question bank

Reusable, so nothing starts from zero

Saved as students work

Answers keep safe if the connection drops

Results and report cards

Released when the teacher is ready

Department analytics

How classes performed, at a glance

Integrity checks

Flags go to a person to review

Built around the roles already inside your school

Student

Takes assigned work, sees results and progress.

Teacher

Creates and assigns assessments, marks, plans lessons.

Head of department

Reviews and publishes, sees the whole department.

Principal and administrators

Sets up the school and sees across it.

Your school chooses how exams are reviewed

Direct publish

A teacher writes and publishes to their class.

Department review

A head of department reviews and publishes.

Multi-stage review

Team lead, senior lead, then department head.

Fair, secure and accessible by design

Fullscreen lock and tab-switch detection

The exam notices when a student leaves the window.

Single-device sign-in

A student is signed in on one device at a time.

Safe if the connection drops

Answers are kept on the device and sync when it returns.

Read-aloud support

A teacher can switch it on for a student who needs it.

A person always decides. Integrity flags are for a teacher or leader to review; nothing is concluded about a student automatically.

Smart Learning: deliver and recover learning

Assessment tells us what happened. Learning tells us what we do next.

When a student misses three days

Mon to Wed

The student is away. The class moves on.

The lesson is waiting

The teacher assigned it with the day it was taught.

A path back in

Steps, check questions and progress, at their own pace.

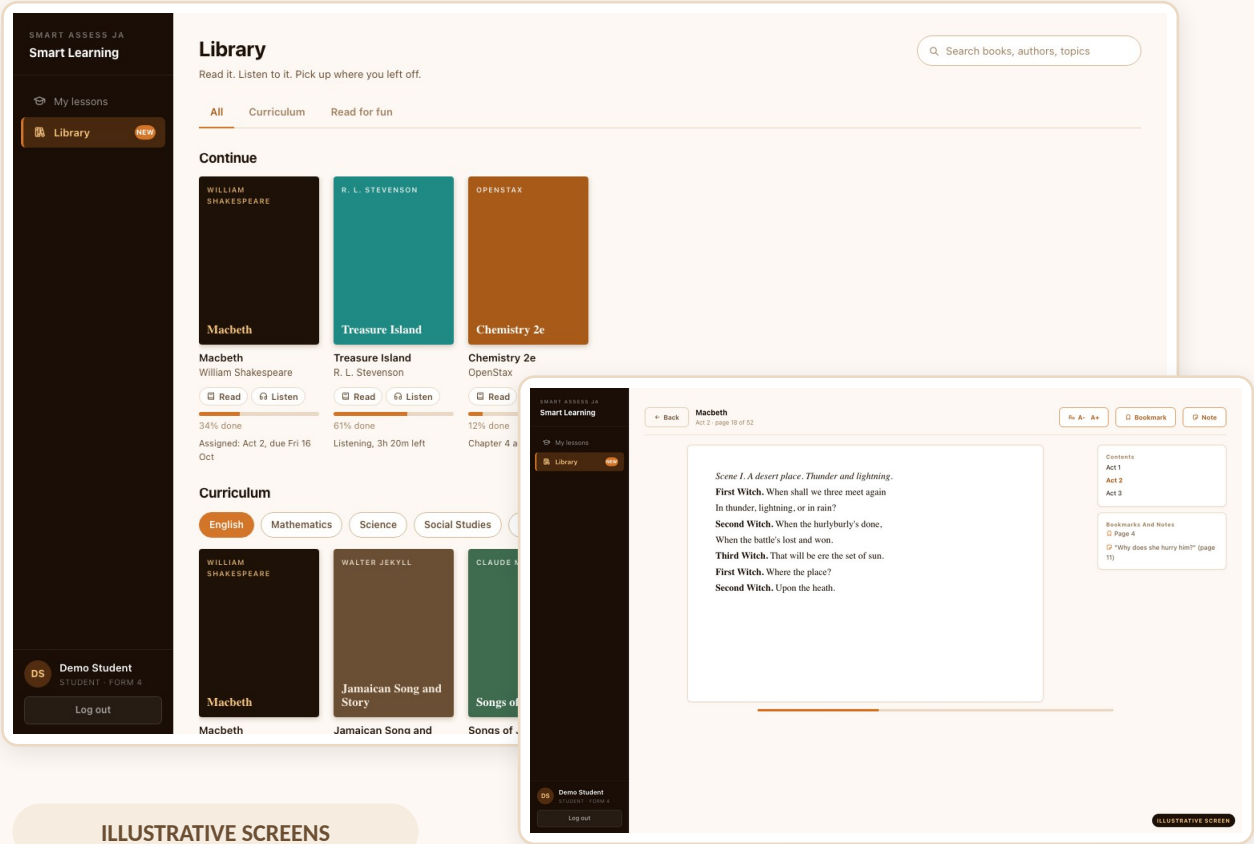

The teacher can see it

Who has caught up, and where they got stuck.

Designed so that missing class does not mean missing the learning.

The Library: read it, listen to it

Books for the curriculum and books for the joy of reading, in the same place as the lessons.

Read or listen

Page-by-page reading with bookmarks and notes, and audio that remembers where you stopped.

Two shelves

Curriculum titles such as the set Shakespeare plays, and a read-for-fun shelf.

Teachers assign reading

Pick a book, a class and a due date. The teacher sees who has read it.

The school stays in control

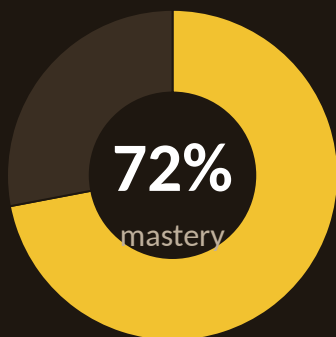

Switch the Library on, choose shelves and forms, hide any title.

Every title is chosen and cleared by Smart Assess Ja. Public domain or openly licensed.

Smart Play: engage and reinforce learning

Topic Mastery

Fractions

7 day streak

+120 XP

Practise one topic at a time and watch mastery grow.

Math Duels

Same questions, compare scores

You

8

Classmate

6

$$7 \times 8 = ?$$

54

56

63

48

Challenge a student in your grade to the same questions.

Live Quiz

On the projector, answered on devices

Join code 4 8 2 1

24 joined

Which fraction equals $1/2$?

$2/4$

$3/5$

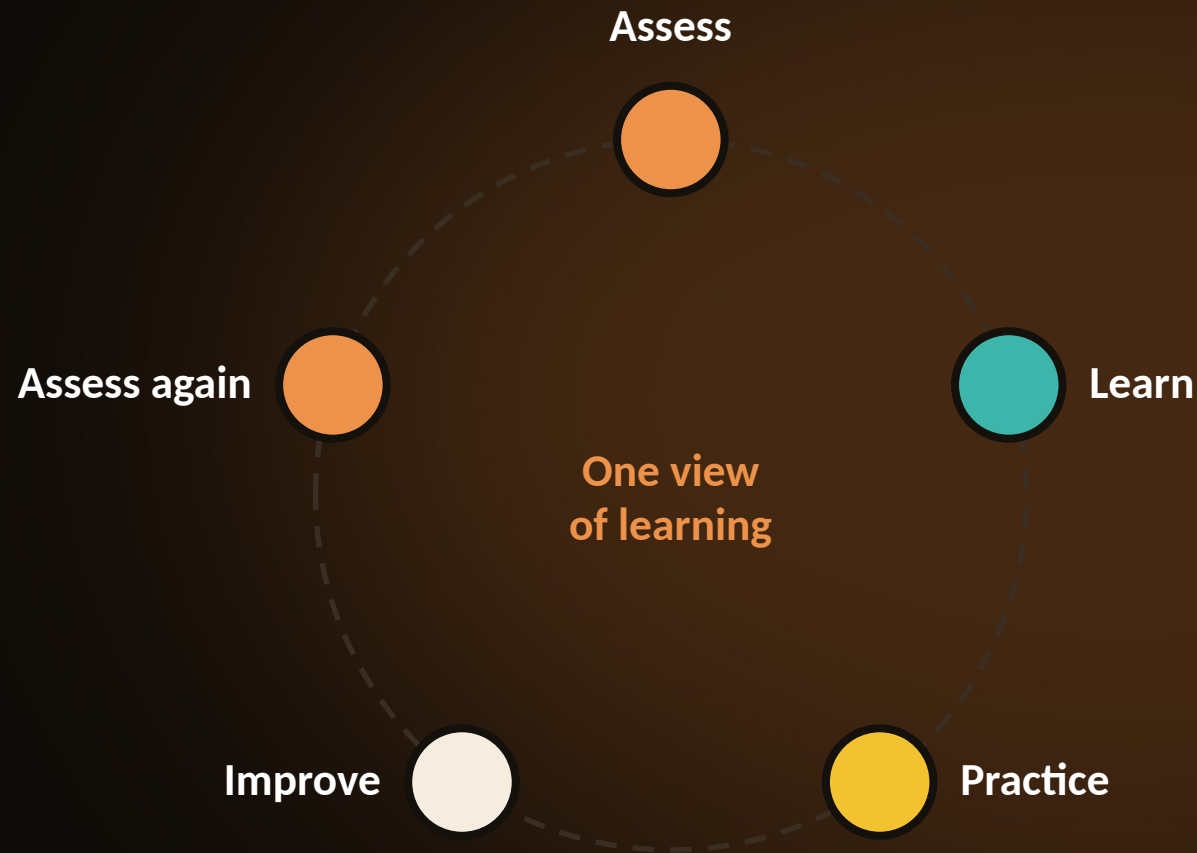

$2/3$

$1/3$

Enter the code on the teacher's screen and race the class.

Illustrative mock-ups of planned Smart Play screens. Practice and reinforcement, not a replacement for formal assessment.

Assess, learn, practice, improve, assess again

Information flows to the right people

School leadership

Head of department

Teacher

Student

Teachers see classrooms. HODs see departments. Leaders see the school

Teachers

- Tests, tasks and the question bank
- Lesson plans and Smart Learning lessons
- Marking and results
- Attendance for their classes
- Report an absence and see cover

Heads of department

- Classrooms and teachers in the department
- Analytics and flagged sessions
- Final exams and report cards
- Department attendance and topics
- Arrange cover for absent teachers

Principal and administrators

- Staff, students and timetable
- Attendance and alerts across the school
- Integrity and AI tutor oversight
- Messages across staff
- School setup and settings

Trust, data and AI with a person in charge

Your data

- Each school's data lives in its own separate environment
- Access rules are enforced by the database itself
- Two-factor sign-in is required for all staff
- Handled in line with Jamaica's Data Protection Act

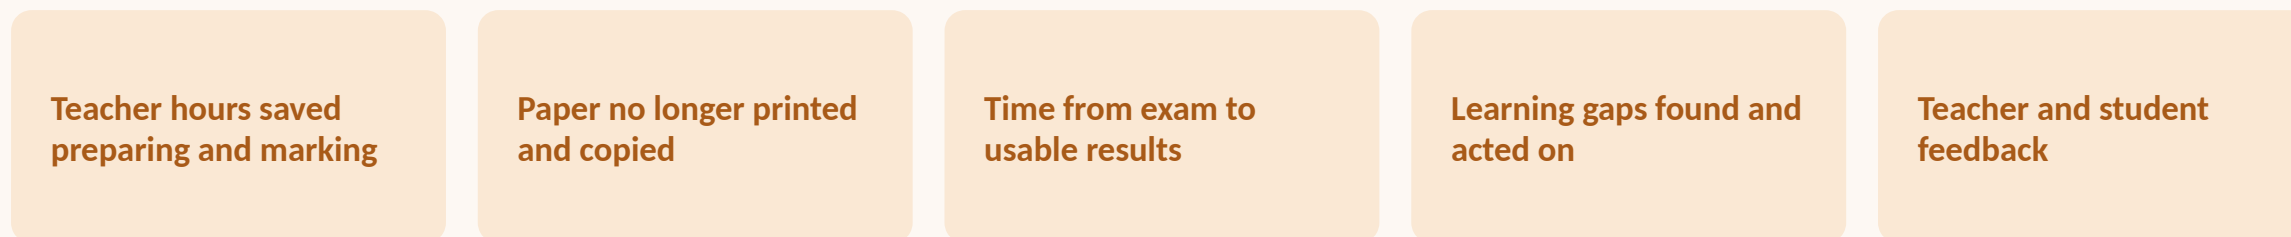

AI on a short leash

- AI helps a teacher write: polish a question, import from a PDF, draft a lesson plan
- AI never grades a student
- Every suggestion is reviewed by a person before it is used
- The optional AI tutor stays inside a lesson, with adult review of flagged conversations

A pathway we can shape together

How we would measure success

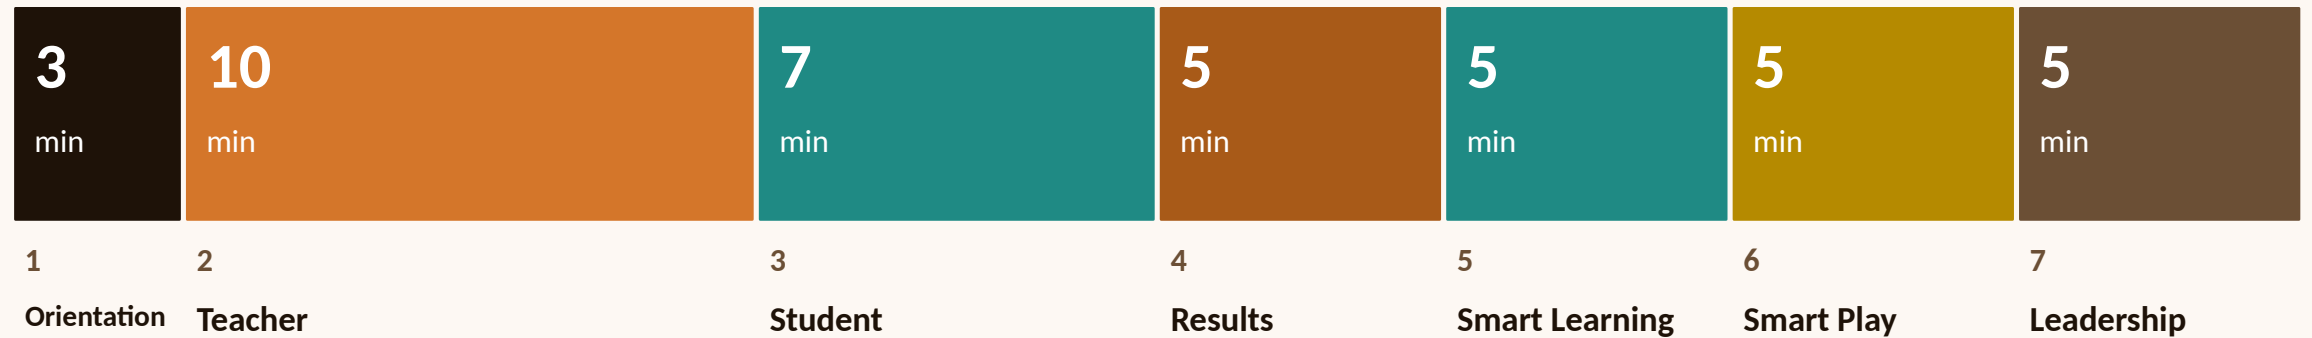

Scope, timing and measures are decided with you. This is a starting proposal.

Now, experience it.

Teacher. Student. Leadership.

The hands-on session: about 40 minutes

Then: explore on your own

10 minutes to try the challenge sheet for your role.

And finally: decide together

What would need to be true, and where would you start?

Everyone will experience Smart Assess from a different perspective

Teacher

Create, assign, mark

Student

Take it, submit it, see progress

Leadership

See across classes and departments

The ecosystem connects these experiences.

Teacher experience: ten things to find

1 Log in

2 Explore the teacher dashboard

3 Identify the assessment tools

4 Explore the question bank

5 Open or create an assessment

6 Review the question types

7 Explore class assignment

8 Explore marking and results

9 Explore lesson planning

10 Observe the whole workflow

At every stage, ask:

**How much time would
this normally take?**

Then compare with the paper way: write,
print, copy, collect, mark.

Student experience: take it, submit it, see it

- 1 Log in
- 2 Open assigned work
- 3 Experience the assessment
- 4 Answer the questions
- 5 Navigate the assessment
- 6 Submit
- 7 See the result or progress view

Smart Assess is not simply digitizing a PDF.

It is a structured digital assessment workflow.

What the teacher sees

Builds, assigns, marks and reviews results.

What the student sees

Only their own work, in a focused view they can save and submit.

From assessment to performance information

Ask the room

What would you normally do after receiving these results?

Then connect it to Smart Learning

Results show what happened. Learning decides what happens next.

Assessment tells us what happened. Learning tells us what we do next

Show, where enabled:

The 5E lesson

Topic

Student progress

Check-your-understanding

Coverage

The Library, if on

Smart Learning is switched on at Manchester. Demonstrate only what is enabled.

THE MANCHESTER SCENARIO

A student misses three days of school.

Show how Smart Learning is designed to give that student a path back into the learning.

Not every learning activity should feel like an examination

Jeopardy-style board

Fractions	Algebra	Shapes	Data
		100	100
200	200	200	
300	300	300	300
400	400	400	400

Students buzz in from their own devices

Pick categories and run a buzz-in board on the projector.

Tug of War

Team A

Team B

Every student appears on the field

Two teams race through quick questions and pull the rope.

XP, badges, streaks, leaderboards

Weekly XP

7 day streak

Student A

Student B

Student C

Rewards that keep practice going.

Illustrative mock-ups of planned Smart Play screens. Not live at Manchester.

Leadership: a broader view of the school

Leadership gets a broader view of the school

HODs see their departments

Teachers see their classrooms

Show, where appropriate

- Department information
- Analytics
- Attendance
- Student performance
- Teacher and class information
- Curriculum and topic coverage
- Leadership oversight

Think about the current process for creating, printing, administering, marking and analyzing an examination.

Create

Print

Copy

Administer

Collect

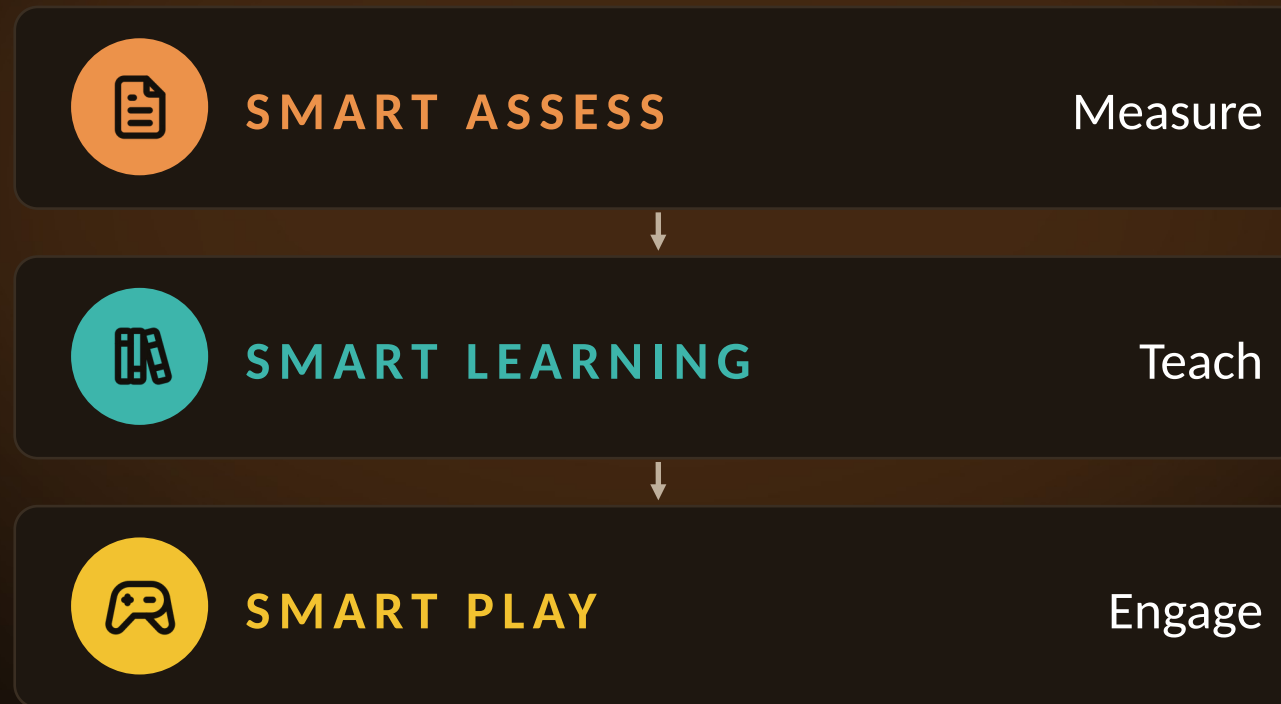

Mark

Record

Analyze

How many steps just disappeared?

And what becomes possible when assessment data is connected to learning and reinforcement?

Your turn: 10 minutes to explore

Teacher

- ☐ Find your class
- ☐ Find or create an assessment
- ☐ Find the question bank
- ☐ Find lesson planning
- ☐ Find student results
- ☐ Find progress information

Student

- ☐ Find your assigned work
- ☐ Complete an assessment
- ☐ Submit
- ☐ Find your progress and results

HOD or administrator

- ☐ Find department information
- ☐ Find analytics
- ☐ Find attendance
- ☐ Find student and teacher information

Stuck? Say what you are trying to do. We will guide you rather than take over your screen.

Eight questions to keep the conversation open

What currently takes the most time when preparing an examination?

Phase 2

How much printing does assessment require?

Phase 2

How long does it normally take before teachers can analyze results?

Phase 4

What happens when a student misses an important lesson?

Phase 5

How do HODs currently identify learning gaps across classes?

Phase 7

What information would leadership like to see that is difficult to get today?

Phase 7

Which part of this workflow would save teachers the most time?

Any time

Which feature would you want your department to use first?

Any time

What would need to be true for Manchester High School to adopt this?

People

Who would lead? Who needs to be on board?

Process

What changes in how exams are set, marked and reviewed?

Technology

Devices, connectivity, sign-ins and support.

Training

Who needs training, and when?

Data

What do leaders need to see, and how is it protected?

Implementation

Where does it start, and what is the first term like?

WHAT COULD MANCHESTER HIGH SCHOOL LOOK LIKE WITH SMART ASSESS JA?

SMART ASSESS

Measure learning.

SMART LEARNING

Deliver and recover learning.

SMART PLAY

Engage and reinforce learning.

ONE SCHOOL. ONE ECOSYSTEM. ONE CONNECTED LEARNING EXPERIENCE.

Where would you start?
