

STRATEGY SESSION AND LIVE DEMONSTRATION

SMART ASSESS JA

Smarter assessments. Better learning.

BUILT FOR MANCHESTER HIGH SCHOOL

SURVEY

ASSESS

LEARN

PLAY

WHY US

WHY WE BUILT IT

TECHNOLOGY FINALLY ORGANISED AROUND HOW A SCHOOL ACTUALLY WORKS.

That is the idea behind Smart Assess Ja.

ASSESS

LEARN

PRACTISE

One school. One set of people. One shared topic list.

SURVEY

ASSESS

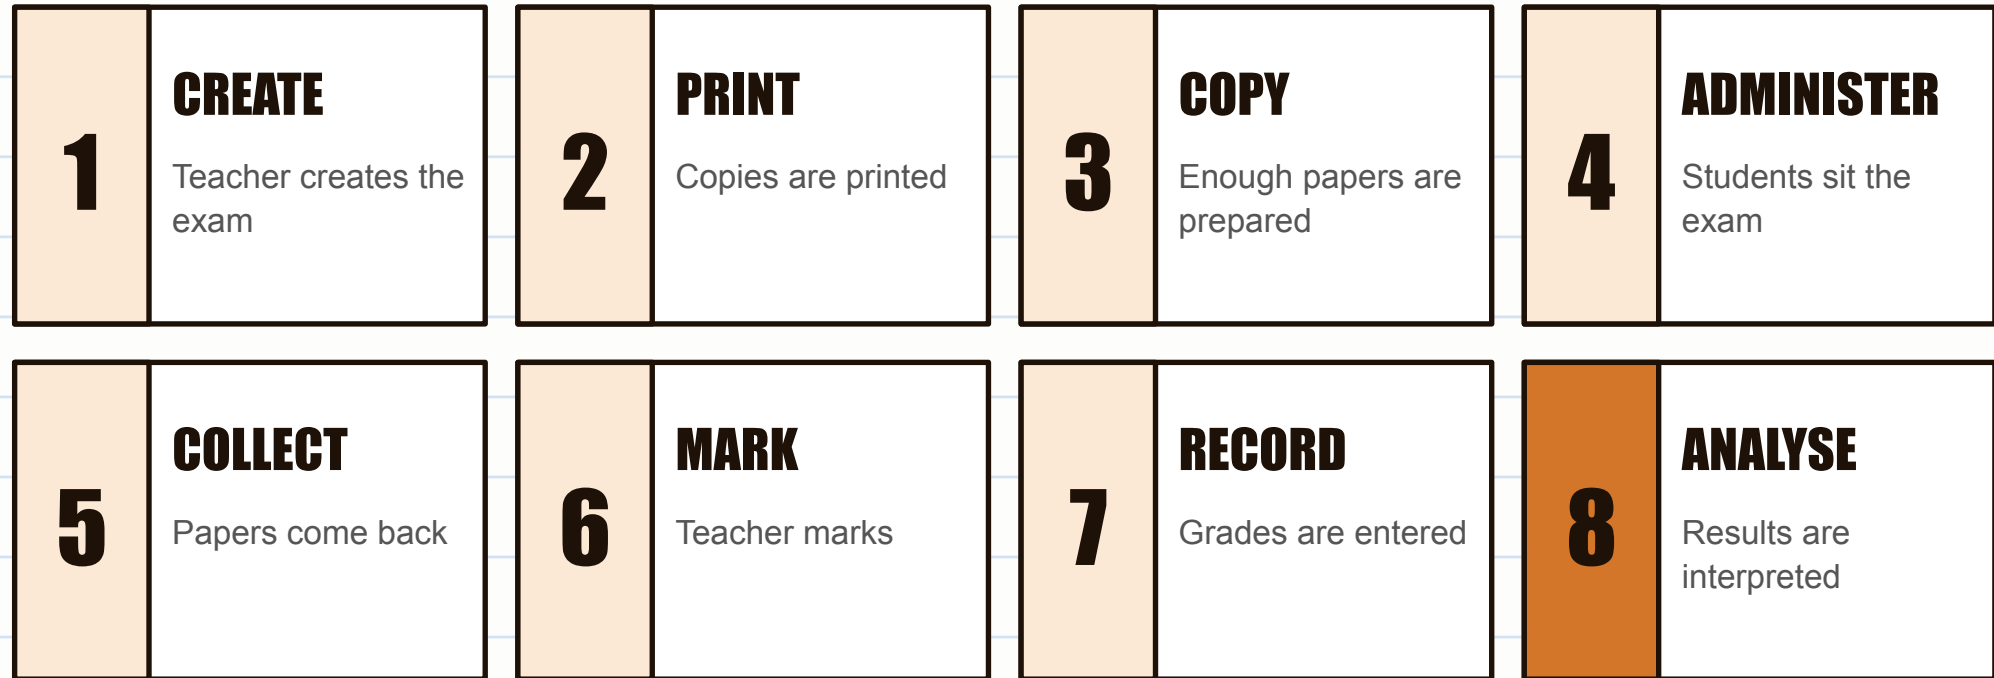

LEARN

PLAY

WHY US

THE PROBLEM

EVERY TERM, LEARNING TRAVELS ONTO PAPER, AND BACK AGAIN

This consumes time, money, paper and administrative effort.

The assessment itself may take one hour. The work around it can take much longer.

SURVEY

ASSESS

LEARN

PLAY

WHY US

YOUR SCHOOL

ONE SCHOOL OF ABOUT 1,800 STUDENTS AND 100+ STAFF

≈ **1,800**
STUDENTS

100+
MEMBERS OF STAFF

Every test, lesson and class creates information. Can teachers and leaders see it?

STUDENTS

Take work, see results, catch up

TEACHERS

Set, mark and teach

HEADS OF DEPARTMENT

See a whole department

PRINCIPAL AND ADMINISTRATORS

See the whole school

SURVEY

ASSESS

LEARN

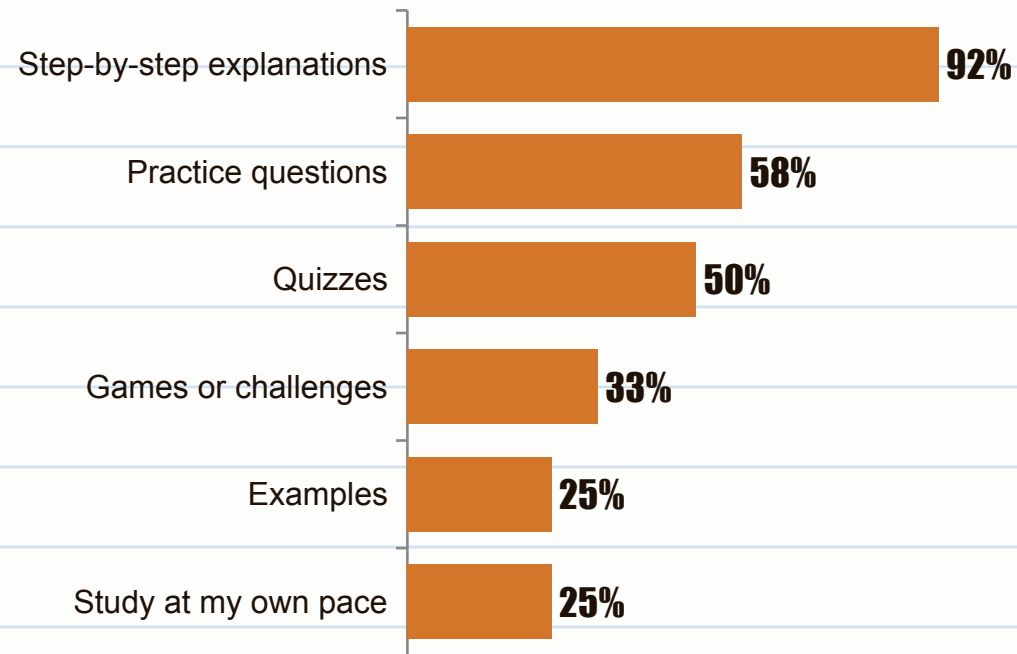

PLAY

WHY US

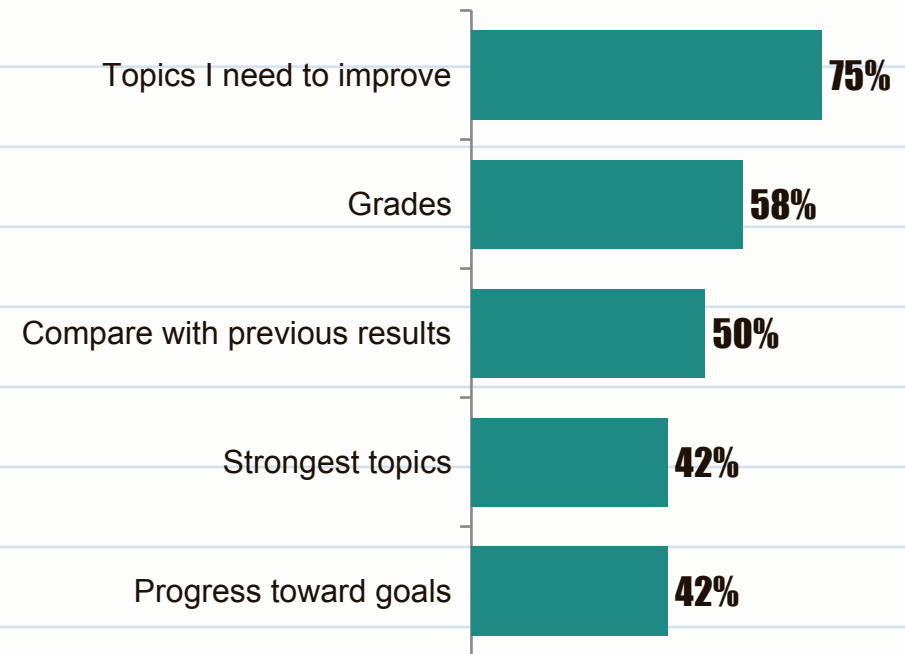

WHAT MANCHESTER STUDENTS TOLD US

STUDENTS WANT TO BE SHOWN HOW

WHAT WOULD HELP YOU LEARN A DIFFICULT TOPIC?

WHAT WOULD YOU WANT TO SEE ABOUT YOUR PROGRESS?

83% want help studying for exams. 58% chose flashcards for practice.

Manchester High School student survey, 12 students, who ticked as many answers as they liked. A small sample: read it as a signal.

SURVEY

ASSESS

LEARN

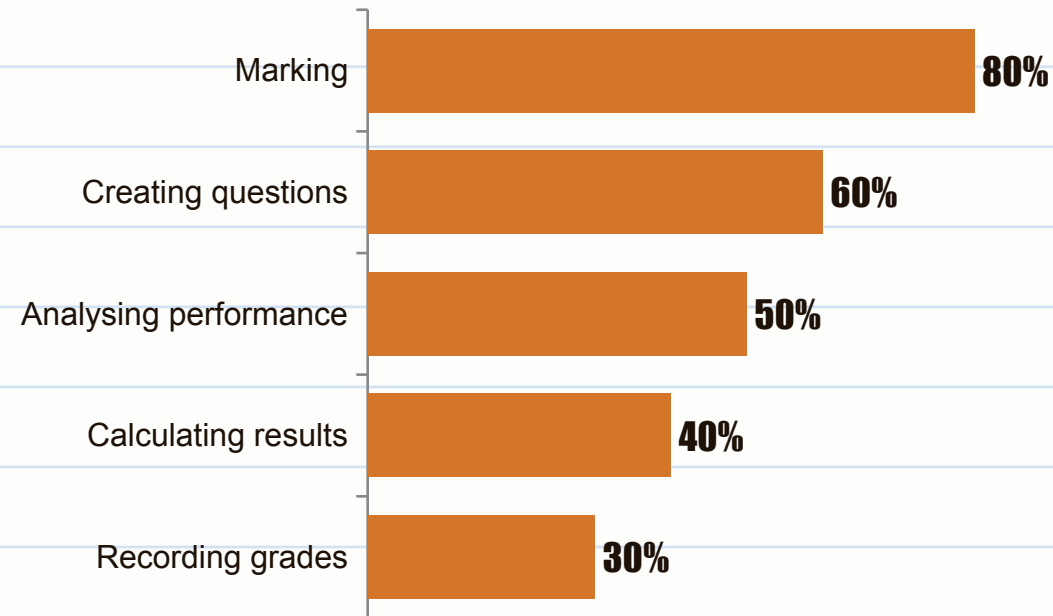

PLAY

WHY US

WHAT MANCHESTER TEACHERS TOLD US

MARKING IS WHERE THE TIME GOES

WHICH PARTS OF ASSESSMENT TAKE THE MOST TIME OR EFFORT?

90%

want the system to show what an absent student missed

90%

want different activities for different ability levels

80%

want AI-assisted lesson planning

"A learning gap tracker that analyses assessment results and suggests activities for reteaching and practice."

ONE PLATFORM, THREE PRODUCTS

ALREADY BUILT. READY TO USE.

1

SMART ASSESS

Measure learning. Set, sit, mark and understand tests, exams and results.

ALREADY BUILT

2

SMART LEARNING

Deliver and recover learning. Lessons, plans, study support and catch-up.

ALREADY BUILT

3

SMART PLAY

Engage and reinforce learning. Quick games, duels and rewards.

COMING SOON

They share one school, one set of people and one topic list.

SURVEY

PLAY

WHY US

MEET THE PRODUCT

1 SMART ASSESS

Measure learning.

Set, sit, mark and understand tests and exams in one secure record. Teachers save time on marking, students see exactly what to work on, and leaders see how every class and department is doing.

WHAT IT DOES

Build tests and exams, with AI help you always review

Mark automatically, with AI-suggested essay marks you decide on

See what the class missed and who needs support

For teachers, students, heads of department and leaders.

ALREADY BUILT

SURVEY

ASSESS

LEARN

PLAY

WHY US

EVERY ASSESSMENT, ONE SECURE RECORD

EXAMS, TESTS AND TASKS

Pop quizzes to end-of-year exams, plus assignments and homework. Five question types, with images and audio.

QUESTION BANK

Save a question once, tag it to a topic, reuse it in future tests.

SUBJECT TOOLS

Built for each subject, starting with an equation toolbar and calculator for maths.

PDF IMPORT AND AI DRAFTING

Turn an exam PDF into questions, or draft questions from a topic. You review every one.

SECURE SITTING

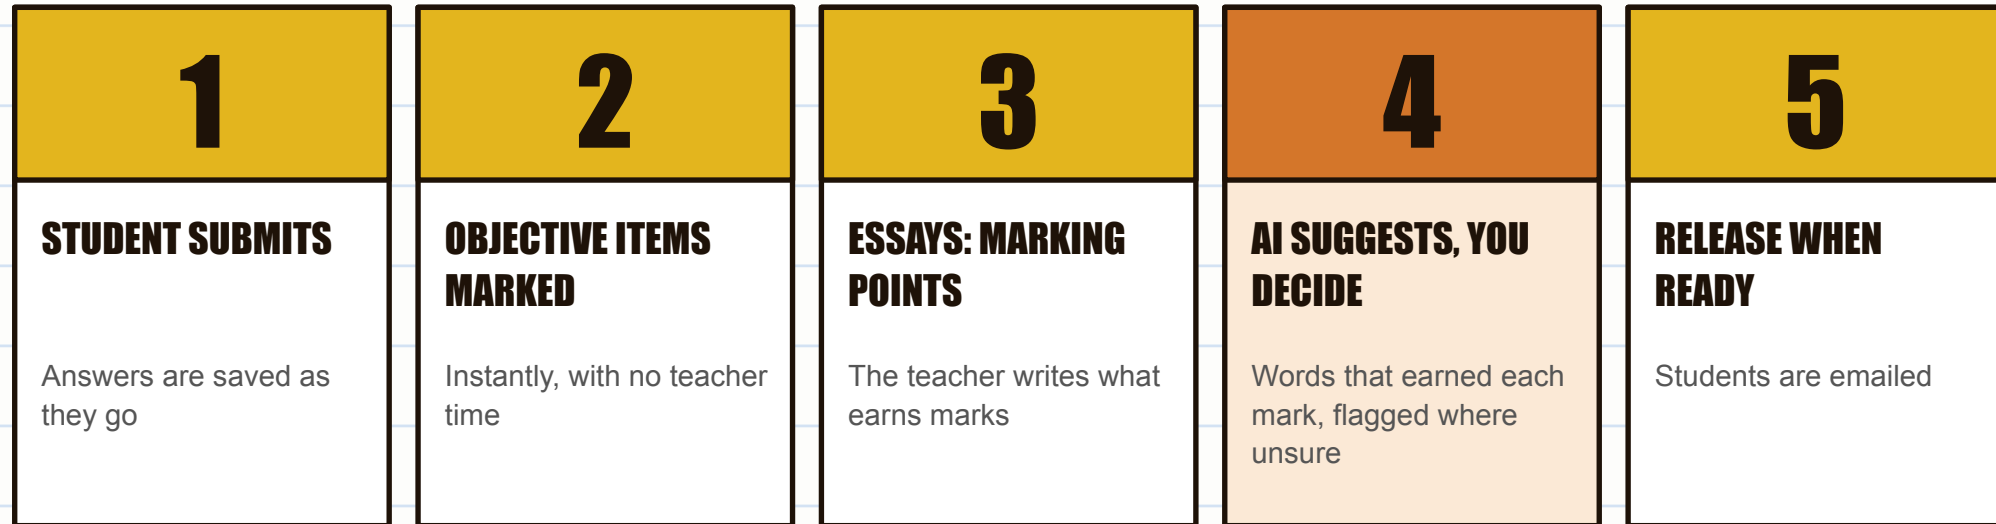

One device, tab-switch logging, blocked pasting, a desktop lock-down app, saved answers.

MARKING AND RESULTS

Automatic marking, essay marking points, controlled release and report cards.

For assessment only. Lessons belong to Smart Learning, games to Smart Play.

MARKING THAT SAVES TIME

THE AI NEVER SAVES A MARK.

It never sees a student's name, and it runs only when a teacher asks. The school switches it on.

80% of teachers named marking as the biggest drain on their time.

RESULTS THAT TELL YOU WHAT TO DO

EXAM INSIGHT

- Which questions the class missed
- The wrong answer most students chose
- Who may need support, and why
- Compared with the last five tests

FOR TEACHERS

MY TOPICS

- Students see which topics need work
- Built from released, marked results
- 'One tap' to practise a weak topic
- Links to lessons on that topic

FOR STUDENTS

SCHOOL ANALYTICS

- Pass rates by subject and department
- Flagged exam sessions in one place
- Report cards for every student
- Downloadable as a spreadsheet

FOR HODS AND LEADERS

Teachers asked who is struggling (80%) and what mistakes are common (70%).

FAIR, SECURE AND SUPPORTIVE OF EACH STUDENT'S ACCESSIBILITY

LOCK-DOWN AND TAB LOGGING

A desktop app for Windows and Mac locks the screen to the exam. Tab switches are logged and pasting is blocked.

ONE DEVICE AT A TIME

A student is signed in on one device only while sitting an exam.

SAFE IF THE CONNECTION DROPS

Answers are kept on the device and sent when the connection returns. Late work is flagged, not lost.

SUPPORT FOR EACH STUDENT

A teacher can switch on read-aloud and other accommodations for a student who needs them.

A person always decides. Integrity flags are prompts for a teacher or leader, never proof.

MEET THE PRODUCT

2 SMART LEARNING

Deliver and recover learning.

Lessons, lesson plans, catch-up and study support that act on what Smart Assess finds. Students get a clear path back in after a missed lesson, and teachers plan faster with AI help they always review.

WHAT IT DOES

Five-step lessons with checks at three levels

Catch-up for absent students, flashcards and the Library

AI lesson plans shaped by Jamaica and the national curriculum

For teachers, students, heads of department and leaders.

ALREADY BUILT

SURVEY

ASSESS

LEARN

PLAY

WHY US

DELIVER AND RECOVER LEARNING

Assessment tells you what happened. Learning helps you act on what you found.

CHECK YOUR UNDERSTANDING

Short questions in each lesson, at support, core and stretch levels.

AI LESSON PLANS

A full 5E plan with objectives and a DOK level, shaped by Jamaica. You review it.

SHARED PLAN LIBRARY

Browse and copy published plans from teachers at other schools.

COVERAGE GRID

Which topics each class has been taught, and where gaps remain.

CATCH-UP

Absent students are offered the lesson they missed.

TEACHER RESOURCES

Share links and files with your department, tagged by subject and topic.

Also in Smart Learning: weekly class feedback, student support and videos (next slides). For learning only; it does not make or mark assessments.

DOK: HOW DEEPLY STUDENTS THINK

Every lesson plan has a general objective, specific objectives and a DOK level from 1 to 4.

LEVEL 1

RECALL

Remember a fact, a term or a step.

EXAMPLE

State the formula for simple interest.

LEVEL 2

SKILL

Use a method on a familiar problem.

EXAMPLE

Find the interest on J\$20,000 saved for 2 years at 5%.

LEVEL 3

REASONING

Explain why, compare, and justify an answer.

EXAMPLE

Compare two savings accounts and justify the better one for a student.

LEVEL 4

EXTENDED THINKING

Investigate a real problem over days or weeks.

EXAMPLE

Plan and present a savings goal for a class trip, using real bank rates.

The AI suggests a level. The teacher reviews it and can change it. Aim for a mix, not all level 4.

WHEN A STUDENT MISSES THREE DAYS

← My lessons

Lesson 2: Expanding And Applying — The Distributive Property In Real Life

Mathematics · Grade 8 · Testing Teacher · Overdue by 6 days

5 of 5 steps

You have finished this lesson. You can come back to it any time.

Engage ✓ Explore ✓ Explain ✓ Elaborate ✓ Evaluate ✓

Engage
A hook that gets students thinking

Let's start by looking back at one error from your exit ticket in Lesson 1. We will check it together for two minutes.

Now here is a challenge. A school orders 5 boxes of pens. Each box contains $(2p + 3)$ pens, where p is an unknown pack size.

How many pens are there in total? Take a guess before you read on. Think about what happens when you multiply a number by everything inside a bracket. That is exactly what this lesson will teach you to do.

Mark As Not Done Next Step →

Key formulae and vocabulary

Variable: a letter that stands for an unknown number

Term: a number, a variable, or numbers and variables multiplied together

Coefficient: the number in front of a variable

Constant: a term that is just a number, with no variable

Like Terms: terms with the same variable and the same degree

Distributive Property: $a(b + c) = ab + ac$

Expand: multiply the number outside the bracket by every term inside it

Simplify: combine like terms to write an expression in its shortest form

1**MON TO WED**

The student is away. The class moves on.

2**THE LESSON IS WAITING**

It is offered as a catch-up, the day it was taught.

3**A PATH BACK IN**

Steps, check questions and progress, at their own pace.

4**THE TEACHER CAN SEE IT**

Who has caught up, and where they got stuck.

Missing class should not mean losing the learning.

A real lesson screen from the Manchester demo school, shown with demo data.

SURVEY

ASSESS

LEARN

PLAY

WHY US

STUDY SUPPORT THAT FITS EACH STUDENT

FLASHCARDS

Students build their own decks. Flip, then "Got it" or "Not yet". Cards you miss come back sooner.

THREE LEVELS OF PRACTICE

Support, core and stretch questions for each lesson, suggested from a student's topic results.

CURRENT AND FUTURE

What is happening now and what is coming, for students and teachers, with upcoming assignment reminders. No email.

WEAK TOPIC TO LESSON

From a weak topic in Smart Assess, 'one tap' to the lessons and practice for it.

58% of students chose flashcards. 90% of teachers asked for activities at different ability levels.

The screenshot shows a web interface for a lesson builder. At the top, it says 'My lessons' and 'Published Mathematics - Grade 8'. The main title is 'Lesson 2: Expanding And Applying — The Distributive Property In Real Life'. Below the title are tabs: 'Build', 'Checks', 'Assign', 'Catch-up', and 'Results'. The 'Build' tab is active. It contains several input fields: 'Lesson Title' (filled with the lesson title), 'Curriculum Topic (Optional)' (set to 'No topic'), and 'Key Formulae And Vocabulary (One Per Line, Shown Beside The Lesson)' (filled with definitions for Variable, Term, Coefficient, and Constant). At the bottom, there is a section 'Draft the student version with AI' with a description and a 'Draft With AI' button.

A teacher's lesson builder, with the optional "Draft with AI" button. Demo data.

HEAR FROM EVERY CLASS, EVERY WEEK

1**STUDENTS**

One minute per class. How well did you follow? Which topic was hardest? Was the pace right? Anything that helped?

2**TEACHERS**

A short end-of-week reflection for each class: where you are against plan, what went well, what to do next.

3**THE REPORT**

A progress report for each class, with plain advice and an AI summary you check. Printable.

PRIVATE BY DESIGN

Only the class teacher and head of department see names, and only so they can help. Everything else is anonymous and shown only when 5 or more students have answered. The principal team sees anonymous results.

A teacher with reflections still to write gets one email on Friday afternoon.

SURVEY

ASSESS

LEARN

PLAY

WHY US

HELP STUDENTS BEFORE THEY FALL BEHIND

A CLEAR LIST FOR STAFF

Who may need help, and why, in plain words: marks below the school average or falling, absences, unfinished lessons.

SUPPORT PLANS

A goal, a review date and what was done. Shows whether results moved: "Up 12 points in Science".

MY PROGRESS FOR STUDENTS

Compared only with their own earlier results. Never classmates, never the school average.

GENTLE NUDGES

Away from school? Lessons past their date? A kind prompt with a button to the right place.

Teachers see marks only in the subjects they teach. Students never see the staff list, a plan or the school average.

For staff to act on, never to label students. The school average appears only once 5 or more students have results.

VIDEOS YOUR TEACHERS HAVE CHOSEN

1

ADD A LINK

YouTube, Vimeo or Khan Academy. Nothing is uploaded, so the school hosts nothing.

2

APPROVED FIRST

A teacher's video waits for the head of department. A head's video is live at once.

3

A SHORT-VIDEO FEED

By subject and grade. YouTube and Vimeo play right inside Smart Learning.

4

LOW-DATA MODE

No pictures, and a video loads only when tapped. On by itself for slow connections.

5

REPORT A PROBLEM

Two student reports hide a video until a teacher checks it.

Videos stay on their own site. Wifi was raised unprompted, so low-data mode is built in.

SURVEY

ASSESS

LEARN

PLAY

WHY US

THE LIBRARY: READ IT, LISTEN TO IT, ASSIGN IT

1	READ OR LISTEN	Page by page, or audio that remembers where the student stopped.
2	BROWSE YOUR WAY	By shelf, genre or subject: curriculum books and reading for fun.
3	TEACHER ASSIGNMENTS	Assign a book or chapter with a due date and see who finished.
4	BOOKMARKS AND NOTES	Students keep private bookmarks and notes. Teachers cannot read them.
5	SCHOOL CONTROLS	The school chooses shelves, year groups, audio and which titles are visible.

Every title is chosen and cleared by Smart Assess Ja. Schools do not upload books.

MEET THE PRODUCT

3 SMART PLAY

Make practice fun.

Quick classroom games and challenges that make practice something students want to do. Games and exams are kept apart: Smart Play never holds a school's official results.

WHAT IT DOES

Duels, live quizzes, boards and team games

Points, streaks, badges and class leaderboards

Questions from the same topic list as lessons and tests

For students and teachers.

COMING SOON

SURVEY

ASSESS

LEARN

PLAY

WHY US

ENGAGE AND REINFORCE LEARNING

TOPIC MASTERY

Practise one topic and watch mastery grow.

MATH DUELS

Two students race through maths questions.

LIVE QUIZ

A quiz on the projector, answered on own devices.

JEOPARDY-STYLE BOARDS

Categories and points, with buzz-in for teams.

TUG OF WAR

Two teams pull a rope by answering questions.

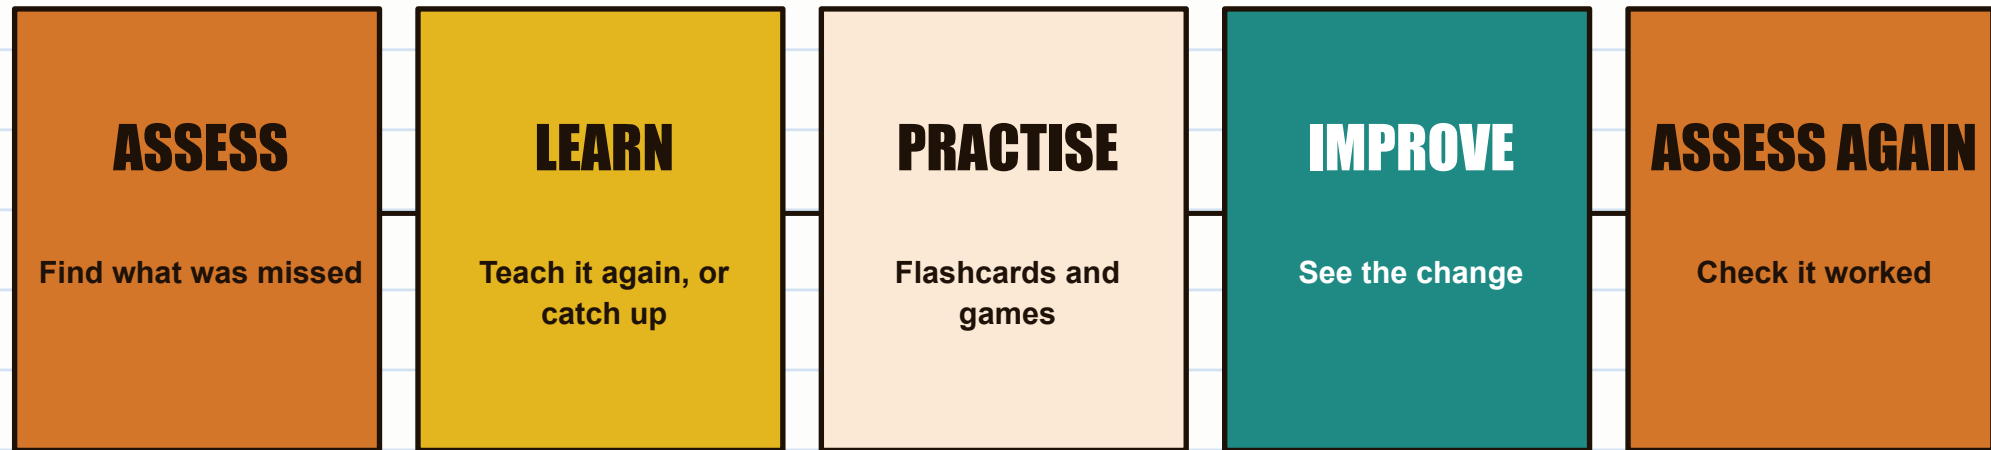

REWARDS

Points, streaks, badges and class leaderboards.

Quick, fun practice. It never holds the school's official results.

JOINED UP

ASSESS, LEARN, PRACTISE, IMPROVE, ASSESS AGAIN

One shared topic list connects them. A weak topic in Smart Assess leads to a lesson in Smart Learning or a game in Smart Play.

SURVEY

ASSESS

LEARN

PLAY

WHY US

BUILT AROUND YOUR ROLES

TEACHERS SEE CLASSROOMS. HODS SEE DEPARTMENTS. LEADERS SEE THE SCHOOL.

TEACHERS

- Tests and the question bank
- Lessons, plans and catch-up
- Marking and results
- Attendance for their classes
- Report an absence, request cover

HEADS OF DEPARTMENT

- Their department's classes and teachers
- Analytics and flagged sessions
- Vet and publish school exams
- Department attendance and topics
- Arrange cover for absent teachers

PRINCIPAL AND ADMINISTRATORS

- Staff, students and the timetable
- Attendance and alerts school-wide
- Integrity and AI tutor oversight
- Messages to staff
- School setup and settings

SURVEY

ASSESS

LEARN

PLAY

WHY US

THE DIFFERENCE

GOOD TOOLS. ONE CONNECTED JOURNEY.

Other platforms are good at what they do.

Smart Assess Ja is designed to connect assessment, learning and practice around the same students, classes and curriculum topics.

The goal: reduce the work teachers do between those activities.

SURVEY

ASSESS

LEARN

PLAY

WHY US

THE QUESTION TEACHERS MAY ASK

WHY NOT JUST USE GOOGLE CLASSROOM?

GOOGLE CLASSROOM

Useful for managing classwork, sharing materials and organising assignments.

SMART ASSESS JA

Designed to go further into the assessment process: create, administer, mark, understand results and support learning.

The difference is the connected workflow, not just a longer feature list.

WHAT SMART ASSESS IS NOT

NOT A TEACHER REPLACEMENT

Teachers stay in control of questions, marking and decisions.

NOT AI MAKING FINAL DECISIONS

AI can help draft and suggest. A person decides, every time.

NOT JUST A PDF ON A SCREEN

It supports the work before, during and after an assessment.

NOT THREE DISCONNECTED APPS

The products share the school, the people and the topic list.

TRUST, DATA AND AI WITH A PERSON IN CHARGE

YOUR DATA

- Each school's data lives in its own separate environment
- Access rules are enforced by the database itself
- Two-factor sign-in is required for all staff
- Handled in line with Jamaica's Data Protection Act

AI ON A SHORT LEASH

- AI helps a teacher write: polish a question, import a PDF, draft a lesson plan
- AI suggests essay marks. It never saves one; the teacher edits and decides
- Every suggestion is reviewed by a person before it is used
- The optional AI tutor stays inside a lesson; the principal can switch it off
- AI is told to use Jamaican examples, the National Standards Curriculum and Vision 2030

YOU ASKED . WE BUILT .

WHAT YOU TOLD US, AND WHAT IS BUILT

YOU SAID	WHAT EXISTS	STATUS
Marking takes the most time (80% of teachers)	Auto-marking, marking points, AI-suggested essay marks	BUILT
